Python & AI/ML Engineer (4+ yrs) who ships **production-grade** data pipelines, **LLM/RAG chatbots** and **multi-agent automation** at scale. Cut a nightly ETL from 18 h → 1.2 h, halved third-party API spend, and **tech lead a 4-dev team** that delivers pixel-perfect results and 99.9 % uptime. **Youngest winner** of the **2024 Mr Perfectionist award** for quality and on-time delivery.

Experience

- **Python Developer - [BotPro Solutions - AI Chatbots](#)** 2021 - 2024
 - **Lead a 4-person** platform **squad**; run **architecture reviews**, **sprints** and **hiring interviews**.
 - **Performance increase**: rebuilt legacy job with **multiprocessing** + **concurrent.futures**, shrinking runtime **17 h → ~80 min** and freeing **16 CPU-hours per run**.
 - **Optimized code** & calls to 3rd Party tools & services, **cutting SaaS cost 50 % (>\$700 / mo)**.
 - Deployed **GPU-accelerated image-similarity micro-service** (OpenCV + Siamese CNN) that spots matches in < 200 ms across a stored images.
 - Launched **1-click WhatsApp/Web chatbot creator** on OpenAI Assistants API—scrapes or ingests training data and deploys in **< 5 min**.
 - Set up and looked after **multiple production servers**, rolling out new services and keeping them running smoothly.
 - Conducted **10+ technical sessions** and mentored juniors to promotion track.
- **Python & AI/ML Engineer - [VRSEN](#)** 2024 - 2025
 - Designed and built **multiple AI Agents** using different models for real-world tasks like research, content creation, code writing, and autonomous deployment.
 - Deployed AI-driven solutions on **Azure, Railway**, and **DigitalOcean**, handling **15M+ queries/day** with **scalable** and reliable infrastructure.
 - Created Multi-Agent Prompt-to-Site Studio that builds websites in 4-5 minutes, saving 90% developer time and 75% project costs, using agency swarm framework and multi-model stacks (GPT-4.1, GPT-4.5, o4-mini-high).
 - Developed **patient-specific healthcare automation for CinqCare**, generating call **scripts** and setting up QnA **bots**, improving the reservation process and patient support experience.

Tech Stack

- **Flask, FastAPI**
- **MongoDB**, AzureDB, PostgreSQL, DynamoDB, SupdaBase
- Pandas, PySpark, Numpy, Matplotlib
- **PyTorch, OpenCV**
- GitHub(CI/CD), **Docker**, **pm2**
- **Pants** Build System
- RAG, LLM, llamaindex, LangChain/LangGraph
- **AWS, AZURE**, S3, ec2, contabo, CloudWatch
- **Scrapy**, BeautifulSoup4, Selenium
- **Playwright**, Requests, **AioHTTP**, **HTTPX**
- **APScheduler**, os, Redis
- **Tkinter**, **nltk**, regex
- Logging, **Pydantic**, marshmallow
- agency-swarm, GroqAI, OpenAI APIs
- VectorDB:**FAISS**|**Pinecone**|**Qdrant**|**Chroma**
